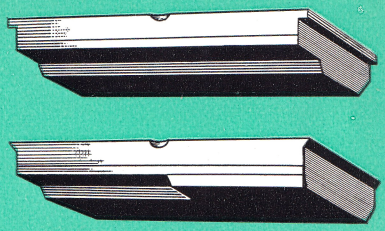
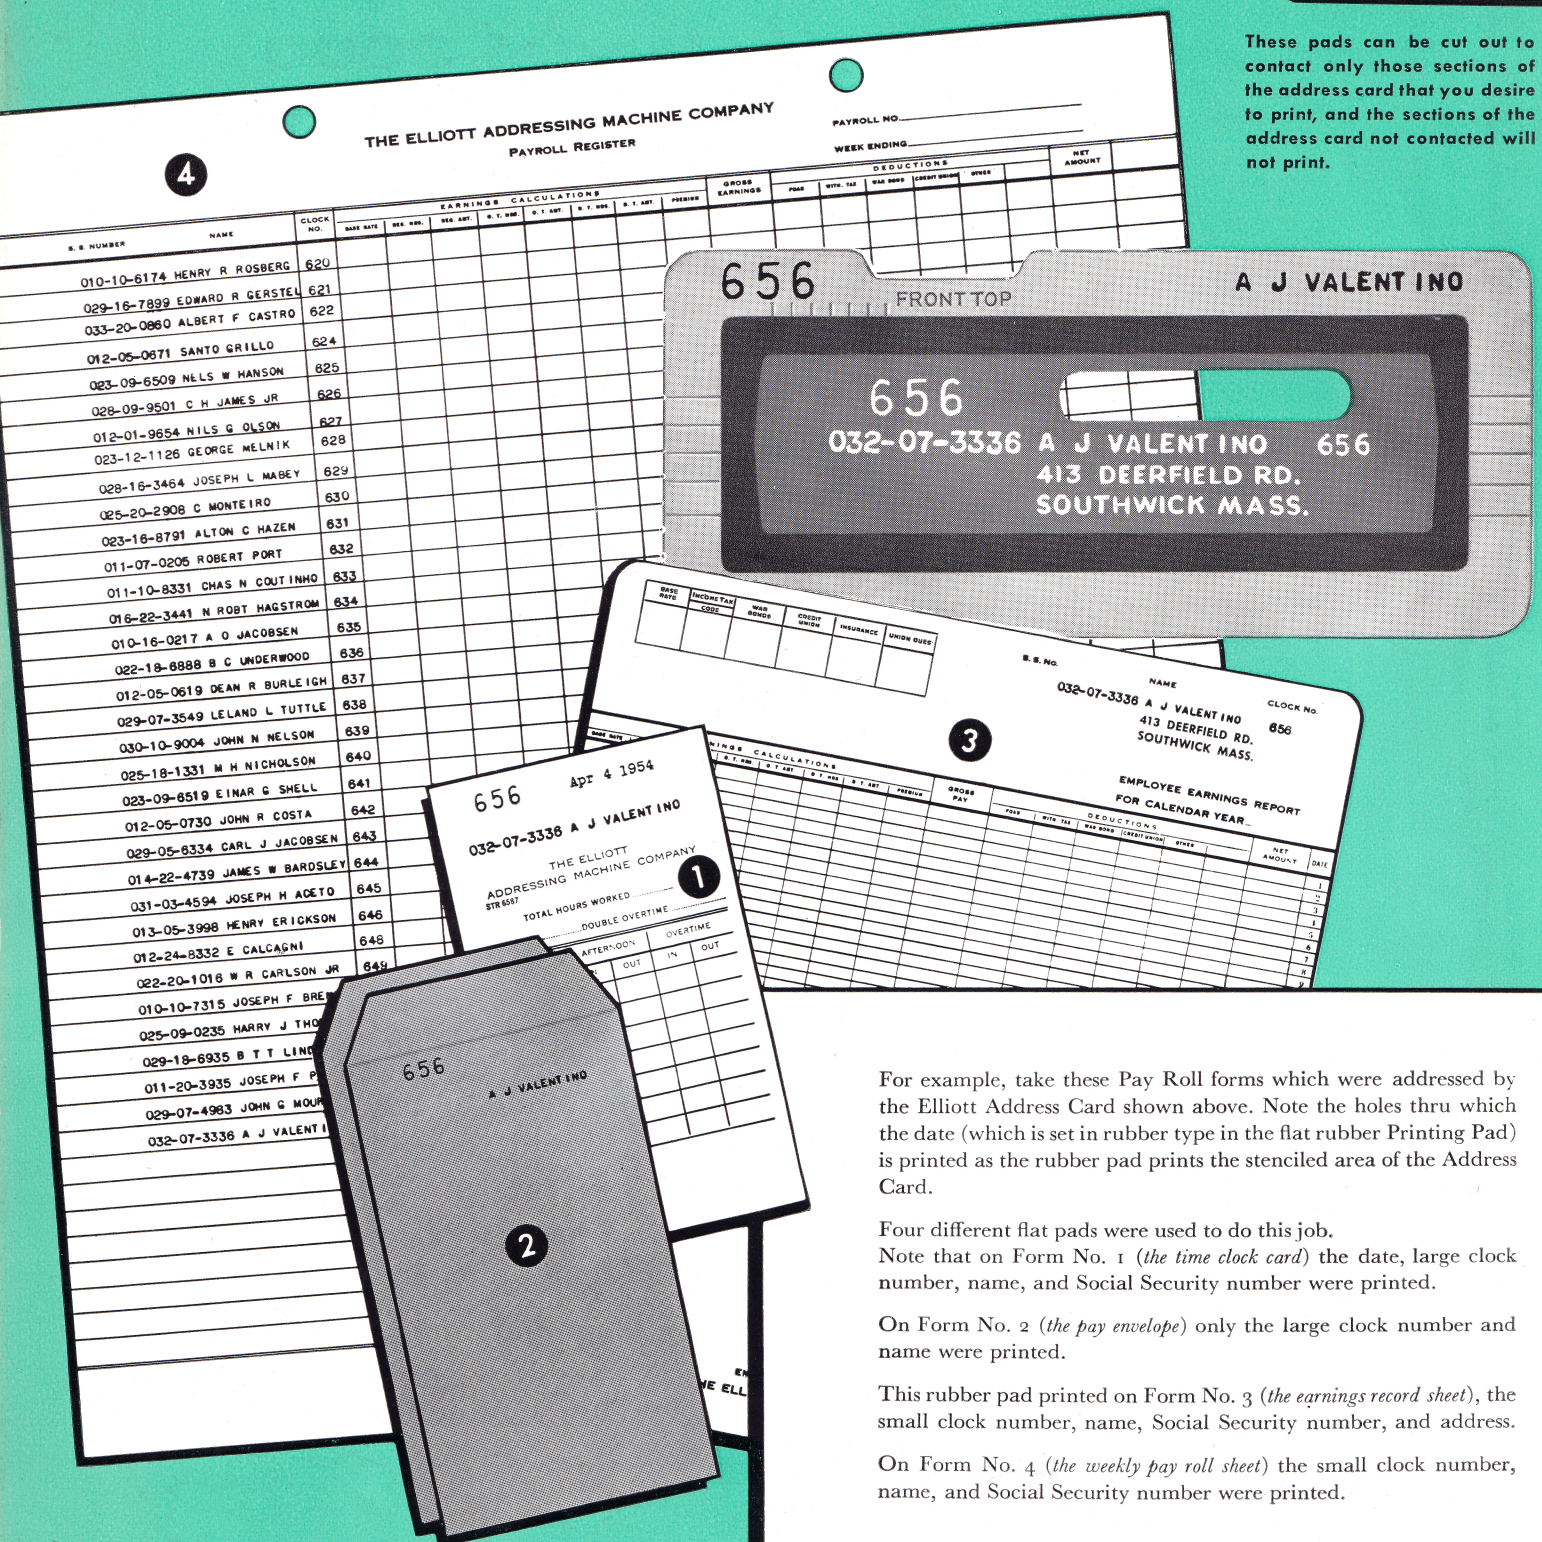
Most Pay Roll forms can be addressed with our Model 3000 Junior round rubber Printing Roll machines but because some addressing problems can be accomplished better with a flat rubber Printing Pad than with a round rubber Printing Roll, the Elliott Model 3000 Senior is also made to print with these

CUT-OUT FLAT RUBBER PRINTING PADS. →



These pads can be cut out to contact only those sections of the address card that you desire to print, and the sections of the address card not contacted will not print.



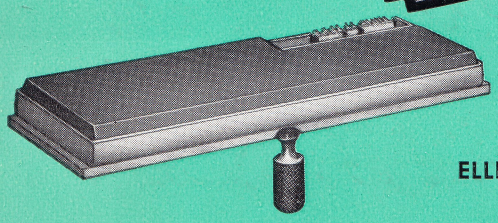
For example, take these Pay Roll forms which were addressed by the Elliott Address Card shown above. Note the holes thru which the date (which is set in rubber type in the flat rubber Printing Pad) is printed as the rubber pad prints the stenciled area of the Address Card.

Four different flat pads were used to do this job.
Note that on Form No. 1 (*the time clock card*) the date, large clock number, name, and Social Security number were printed.

On Form No. 2 (*the pay envelope*) only the large clock number and name were printed.

This rubber pad printed on Form No. 3 (*the earnings record sheet*), the small clock number, name, Social Security number, and address.

On Form No. 4 (*the weekly pay roll sheet*) the small clock number, name, and Social Security number were printed.



ELLIOTT ADDRESSING MACHINE CO. *Main Office:* **Cambridge 39, Mass., U. S. A.**
Offices in All Principal Cities

Pay Roll Sheets and Pay Roll Forms are addressed face up and with

greater speed by *Elliott* **Model 3000 Senior**

This model can be equipped with more than 70 attachments including an attachment to print addresses in column form on pay sheets, tax roll sheets, and dividend roll sheets. This is the world's only addressing machine that delivers such sheets address side up.
